Protein skimmer Bubble King® Supermarin 300

Product no.: 92

Protein skimmer Bubble King® Supermarin 300 for internal filter assembly in aquariums of 1.500 l to 4.000 l.

The skimmer is equipped with two Red Dragon® Bubble King® skimmer pump from Royal Exclusiv®, installed on the side.

A continuously height-adjustable telescopic tube is provided to regulate the water level.

The swivelling water outlet at the side has a tube diameter of 50 mm.

For the fine adjustment of the water level, there is also a 360° pivotable PVC torque tube with a fitted dismountable simple silencer.

The complete skimmer cup can be unscrewed from the pillar tube. The lift height required for this is 30 mm. A pivotable tap is fitted to the bottom for draining off the absorbate.

The master skimmer pump is equipped with a descaling bypass. The pump is connected to the skimmer on the pressure side through a loosely attached Ø 30 mm silicon tube connection piece.

The 9 mm silicon tube is used to transport the air exhaust from the silencer to the pump.

The pumps can be connected in two positions with the skimmers. The grey 6 mm connecting piece on the nozzle base part is set up for ozone supply. The red screw-in nozzle is to set the water volume. The water pumping capacity can be increased by turning.

Important maintenance information!!!

For the smooth functioning of the protein skimmer, the skimmer pump must be regularly cleaned and decalcified!
