Multifunction pumps for water recirculation

SICCE created, first in the market, the Hi-Tech Line, which still nowadays remains a point of reference in the global market. From the model 300 to model 3700, Hi-Tech Line includes completely submersible recirculation pumps useful for every type of aquarium, terrarium, internal or external fountain, landscaping construction, cribs and for any application which requires the recirculation of water. Built in accordance with the most strict international safety standards, the pumps are easy to maintain and have incredible small dimensions for their elevated performance and reliability. The entire line is provided with a variable flow rate regulator as well as adaptors to connect flexible hoses from 13 to 20 mm. The compact dimensions of these pumps, make them ideal for use in small spaces.
