

Reef Octopus BH-50INT Nano skimmer

Thank you for purchasing Reef Octopus BH-50 INT Nano protein skimmer

Introduction:

BH-50INT Nano skimmer is reef octopus newest Dedication to aquarium hobbyist, It uses a new bubble blaster pump OTP-300s as its kernel , and demonstrated a stunning effect.

OTP-300s only have 6W of power but create a 31Gph air intake efficiency, could help to support tanks about 50~200L (12~50Gallon).

Thanks to its excellent combination of accessories, it could have a variety ways to be used and fixed. Hang on interior or put in a sump; fixed on tanks with or without a horizontal reinforcement edge.

This nano skimmer have perfectly matches the reaction chamber with the pump, have solved the general problem often happened on nano skimmers that foam leakage into the tank with the output of water.

It also has a sleek appearance, looks like a perfect work of art, increase a lot of fun to the aquarium you keep.

Installation

1. Find all the accessories; check them, make sure they are not broken.
2. Install the reaction chamber fixed ring on the chamber
3. Connect the air intake pipe to the skimmer pump, make it through the hole on the reaction chamber fixed ring; install the silencer.
4. Fix the pump to the reaction chamber body, there have a hole to insert the outlet of the pump. Make the pump install like the picture shows.
5. Install the hang on device to the reaction chamber fixed ring, using the screws.
6. Hang on the skimmer on you tank.
7. Put the collection cup on position.
8. Connect the pump to power.
9. Adjust the water/bubble level in the collection cup by pulling up the water level adjust pipe. Keep looking after it for a while, make sure it won't overflow.
10. If the foam is not so well, please adjust the hang on device to make the skimmer deeper in water.

Safety

1. Use the skimmer under marked voltage.
2. Make a drip loop as picture shows to prevent the danger of water flow along the wire into the into the socket.
3. Never take maintains of the pump when it is running.
